### **Gentiva Health Services Selects LawBase Matter Management Software**

**Denver, Colorado (March 31, 2006)** — Synaptec Software, Inc. ([www.lawbase.com](http://www.lawbase.com)) has announced that New York-based **Gentiva** ([www.gentiva.com](http://www.gentiva.com)), the largest home health care provider in the U.S., has purchased LawBase Matter Management Software for their legal department. With more than 500 direct service delivery units within over 400 locations, Gentiva purchased LawBase in October 2005 and had the product installed and fully operational by December 2005.

Gentiva attorney Kevin Marrazzo oversaw the review of Gentiva's options for the right practice management solution. According to Marrazzo, "We were highly motivated to find the right software. We had been using Excel to track our documents, which was becoming increasingly inadequate, especially when Gentiva acquired a company with 130 additional offices. We really needed to be able to track systems, create reminders and check status for our matters. We chose LawBase because it was the best solution at the right price."

Marrazzo remarks that reasonable cost was one of many factors that led to the selection of LawBase. He notes that Gentiva preferred LawBase for its versatility, customizability, ease of use, and the fact that it could be installed quickly. Marrazzo explained, "Gentiva's attorneys have now entered hundreds of cases into LawBase and are using the system daily to track cases, run reports and manage information. We are very happy with the performance of the software and the technical support has been excellent. As a result of how successful our LawBase implementation has been, we are considering expanding use of the technology in other departments as well as legal."

Synaptec's President Phil Homburger remarked, "Gentiva's implementation of LawBase called for fast turnaround by our technical team. We are proud to be associated with Gentiva and we look forward to supporting them as they consider expanding the product to other departments within their company."

#### **About Synaptec Software, Inc:**

Based in Denver, Colorado, Synaptec Software, Inc. is the developer of the LawBase case management software package. LawBase has been a leading case management software application for over twenty-five years. The current version of LawBase is the result of

Synaptec's 20 years of experience combined with the latest industry developments to create the most adaptable, intuitive case management product on the market today. LawBase is currently being used by thousands of law office personnel across the country, from sole practitioners to law firms with 750-plus attorneys to the legal departments of Fortune 500 companies and governmental agencies. Combining its links to the Internet and full multimedia capabilities, LawBase provides "Legal software that thinks the way that you do." For more information, please contact Jeffrey J. Tefelske, Esq.
