## FOR IMMEDIATE RELEASE

### New Hyperlink Capabilities in LawBase Legal Software

*Hyperlink functionality to increase communication across a variety of platforms*

**March 15, 2011** –Denver-based Synaptec Software, Inc. has released a new addition to its very capable case and matter management program, LawBase. The addition, called LawBase Hyperlinks, allows users to create external links to existing LawBase files, including favorites and search results.

These links can be sent via email with one click from inside the LawBase program, or can be copied elsewhere, such as into email messages, word processing or other applications. When clicked, the link brings LawBase to the foreground and the linked item is displayed.

Perfect for getting a lawyer up to date on a newly assigned case or for sharing search results, LawBase Hyperlinks make it simple to access and share important information quickly without compromising the tight security LawBase is known for.

The hyperlinks are especially useful when combined with another recent release from Synaptec Software, LawBase Concierge, which allows for automatic task generation. Together these tools allow for the unattended creation of reports with direct database connectivity included in the report itself. The faster access to information saves time and increases effective communication throughout a firm or agency.

#### **About Synaptec Software, Inc.**

Based in Denver, Colorado, Synaptec Software, Inc. is the developer of the LawBase case and matter management software package. A veteran company in the software field, Synaptec has more than 30 years of experience in developing the most adaptable, intuitive case and matter management product on the market today. LawBase is currently being used by thousands of users in law firms, Fortune 500 corporate legal departments and government agencies. LawBase can be installed on premises or hosted remotely.

“Legal software that thinks the way that you do.”
